HTML Assignment Questions

1. **Create a basic HTML page that uses <head>, <title>, and <body> to display your name and class on the web page.**

2. **Write an HTML program that includes 3 paragraphs using the <p> tag, each describing a different course you have.**

3. **Create an HTML page that displays a heading, a paragraph, and separates two sections using the <hr> tag.**

4. **Design an HTML page with a paragraph describing your favorite movie. Use the <br> tag to break the lines within the paragraph.**

5. **Create an HTML document that includes internal and external links using the <a> tag. One should link to another section of your own webpage, and another to Google.**

6. **Write an HTML file that contains a heading and uses the <b>, <i>, and <u> tags to format parts of a paragraph.**

7. **Design a personal profile HTML page with your name in bold, your course in italics, and your institute name underlined.**

8. **Create an HTML page that shows a paragraph with mixed formatting (bold, italic, and underline) using nested tags.**

9. **Write HTML code that uses <hr> to divide a webpage into 3 sections: Introduction, Education, and Contact. Use <br> for spacing within each section.**

10. **Create a simple HTML file that demonstrates the use of all the following tags: <head>, <title>, <body>, <p>, <br>, <hr>, <a>, <b>, <i>, and <u>.**
